Software Engineer focused on backend development and cloud-native systems, experienced in ASP.NET Core, Spring Boot, and AWS infrastructure. Proven track record in building clean-architecture microservices, and deploying resilient multi-AZ environments.

WORK EXPERIENCE

Workforce Bootcamp - FCAJ | ***Amazon Web Services VietNam*** **Jun 22, 2026 – Aug 15, 2026**

- Architected and migrated NeonFoodMap from a local environment to a cloud-native, multi-tier AWS infrastructure, deploying ECS Fargate across 2 AZs with ALB and Multi-AZ RDS MySQL for high availability.
- Configured ECS autoscaling and traffic routing via ALB and Target Tracking policies (2–6 tasks, 70%/90% CPU thresholds), validating stability under a 1,000-request load test.
- Troubleshot deployment failures across ECS, ALB, and RDS, resolving HTTP 503 routing/health-check issues and ECS-to-RDS configuration failures to support 5-minute deployment cycles.
- Engineered IAM policies and CloudFormation IaC with least-privilege access and MFA, collaborating across a 5-member team to integrate an end-to-end GitHub Actions CI/CD pipeline.
- Link: github.com/HaoWasabi/NeonFoodmap

Backend C# Developer Intern | ***TMA Solutions*** **Nov 24, 2025 – Mar 13, 2026**

- Developed backend services for an enterprise multi-tenant SaaS platform using ASP.NET Core 9 and Clean Architecture (4-layer structure), implementing 20+ RESTful API endpoints for user management and tenant lifecycle flows.
- Integrated Keycloak IAM via OIDC protocols, configuring JWT validation, token refresh mechanisms, and Role-Based Access Control (RBAC) to enforce secure tenant isolation.
- Modeled relational database schemas with 10+ entities using EF Core Code-First approach, translating technical specifications into clean migrations, Repository, and Unit of Work layers.
- Architected an asynchronous background email service using MailKit and .NET BackgroundService, decoupling email delivery from the main request flow while ensuring 85%+ test coverage via xUnit and Moq.

PROJECTS

Tour Booking | *Java, Spring Boot, Spring Cloud, React, PostgreSQL, Docker* Step - Dec 2025

- Architected a 6-service microservices system using Spring Boot/Cloud, defining service boundaries, API contracts, and inter-service communication.
- Developed core backend services with 27+ REST endpoints, implementing OAuth2/JWT authentication, Spring Mail notifications, Cloudinary uploads, and JPA-based database relationships..
- Link: github.com/kietng04/BookingTour

Library Management System | *C#, ASP.NET Core, RESTful API, MySQL* Feb - May 2025

- Co-led 5-person team building 15+ REST APIs for reservation/ticketing with full WinForms Admin Panel.
- Designed normalized database schema (3NF), Figma UI prototypes and validated system via Postman testing.

TECHNICAL SKILLS

Cloud & DevOps: AWS (ECS Fargate, ECR, ALB, RDS, EC2), Docker, Kubernetes (Basic)
CI/CD & Automation: GitHub Actions, Git
Backend: Spring Boot (JPA), ASP.NET Core (EF Core), RESTful APIs
Programming: Python, Java, C#

EDUCATION

Engineer's Degree – Software Engineer **Oct 2022 – Present**
Saigon University **GPA:** 3.64 (Merit-based Scholarship recipient for 6 consecutive semesters)

CERTIFICATIONS & TRAINING

TOEIC 730 – *ETS (IIG VietNam)* **Issued Oct 2025**

ACTIVITIES & AWARDS

Vice President – AWS Student Builder Group SGU **Dec 2025 – August 2026**

- Led the core team in organizing AWS technical workshops, engaging 100+ students per session.
- Facilitated cloud computing knowledge-sharing sessions and supported IT students in developing practical cloud skills.

Standing Committee Member – Youth Union, IT Faculty **Apr 2024 – July 2026**

- Coordinated 5–6 events per semester with 200–300 participants, handling planning, logistics, and vendor coordination.

Academic Excellence & Recognition

- University-level "Student of 5 Merits", Saigon University (Jan 2026).
- ICPC Training Team: Selected among top 10 outstanding students for competitive programming preparation.
